Profile

Second-year IT student in Cebu, Philippines, focused on building web applications and practical software tools. Open to internship opportunities, collaborations, and client work.

Education

Information Technology	Second-year student

Selected projects

FORGE

`Core app complete; AI assistants in progress | Java / JavaFX / SQLite`

A JavaFX desktop e-commerce app for a technology shop. Includes product search and filters, cart and checkout, order history, and an admin editor for products, photos, and stock.

Portfolio Studio

`Complete and deployed | React / TypeScript / Vite / Supabase / PostgreSQL`

A portfolio builder for students with five templates, email and Google sign-in, private photo storage, and database access policies. Live at myfolio-studio.vercel.app.

Thesa

`In development | Next.js / Tiptap / Supabase / Python / FastAPI / Gemini`

A thesis-writing workspace with chapter editing, PDF/DOCX/TXT source reading, and autosave. Its Gemini assistant answers from selected sources with source and page citations. The app is in local preview; cloud imports need the latest database migration, and citation insertion and PDF/DOCX export are unfinished.

NetPath

`In development; local and offline | JavaScript / HTML / CSS / Node.js / SQLite`

A networking classroom with 37 lessons, 181 practice questions, subnetting and VLSM tools, 18 Packet Tracer companion labs, and a network sandbox. It is designed for one user, runs locally, and is not hosted.

Portfolio tech stack

Languages	Java, C#, Python
Frontend	HTML, CSS, React, Next.js
Backend	Node.js, ASP.NET, FastAPI
Data	SQL, Supabase
Desktop	JavaFX
